

span::ir::expr::Expr

```
graph BT; B["span::ir::expr::BinaryExpr"] --> E["span::ir::expr::Expr"]
```

The diagram illustrates a relationship between two Rust types. At the bottom is a gray box labeled 'span::ir::expr::BinaryExpr'. At the top is a white box labeled 'span::ir::expr::Expr'. Two blue arrows originate from the top of the gray box and point upwards to the bottom of the white box, indicating that 'BinaryExpr' inherits from or implements 'Expr'.
